

EX NO: 3A

DATE:

Working with Video Editing tool Open Shot to edit and mix video content, remove noise, create special effects, add captions

Aim:

To edit and mix video content, remove noise, create special effects and to add captions using Open Shot software.

Procedure:

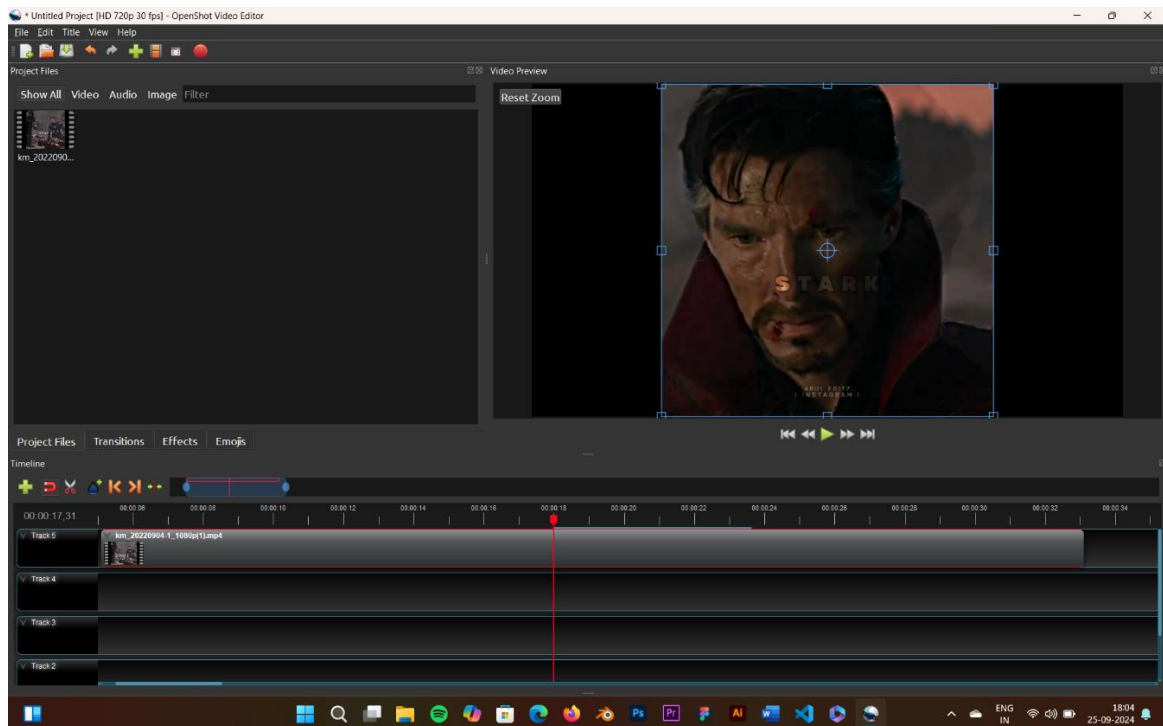

- 1.Go to the browser and paste the link <https://www.openshot.org/>
- 2.Install the software based on your OS.
- 3.Once done, the welcome screen looks like this.

Working with Open shot Software:

Step 1: Click on the File menu in the navigation bar and then import required files for editing.

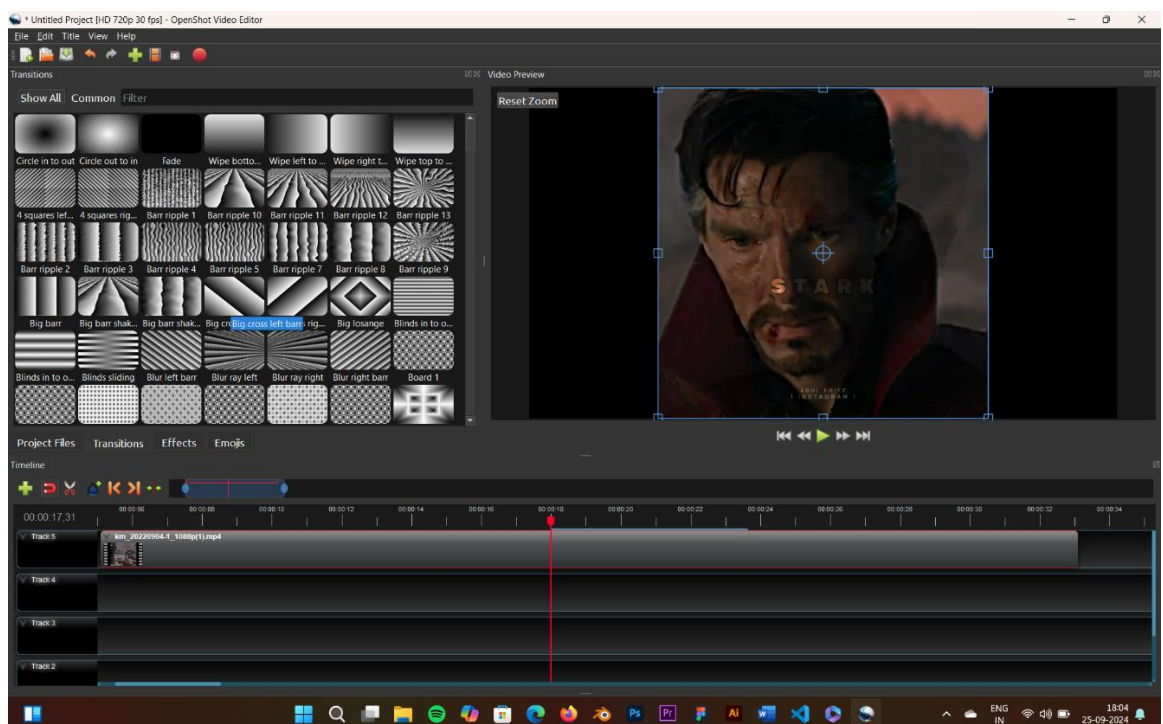

Step 2: Drag and drop the video to the track then the screen looks like this.

Step 3: Right click on the Video, then click on the slice option and click on the keep both sides.

Step 4: Click on the first part of the video then click on the Transitions which was in the upper side of the track.

Step 5: Drag and drop the transition effect between the sliced video part, and the screen looks like this.

Step 6: Explore Effects and other options in the app.

Result:

Thus the expected output after adding transitions and simple effects using Open Shot software was achieved successfully.
