**DATE:**

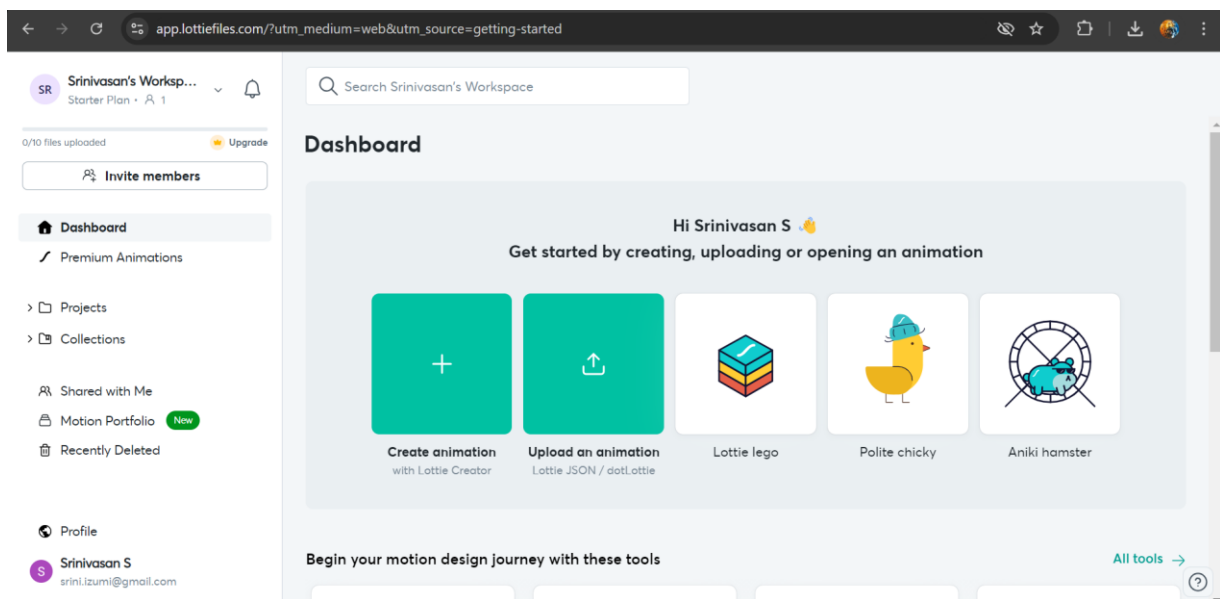

## Mobile UI Animation using Lottie.

### Aim:

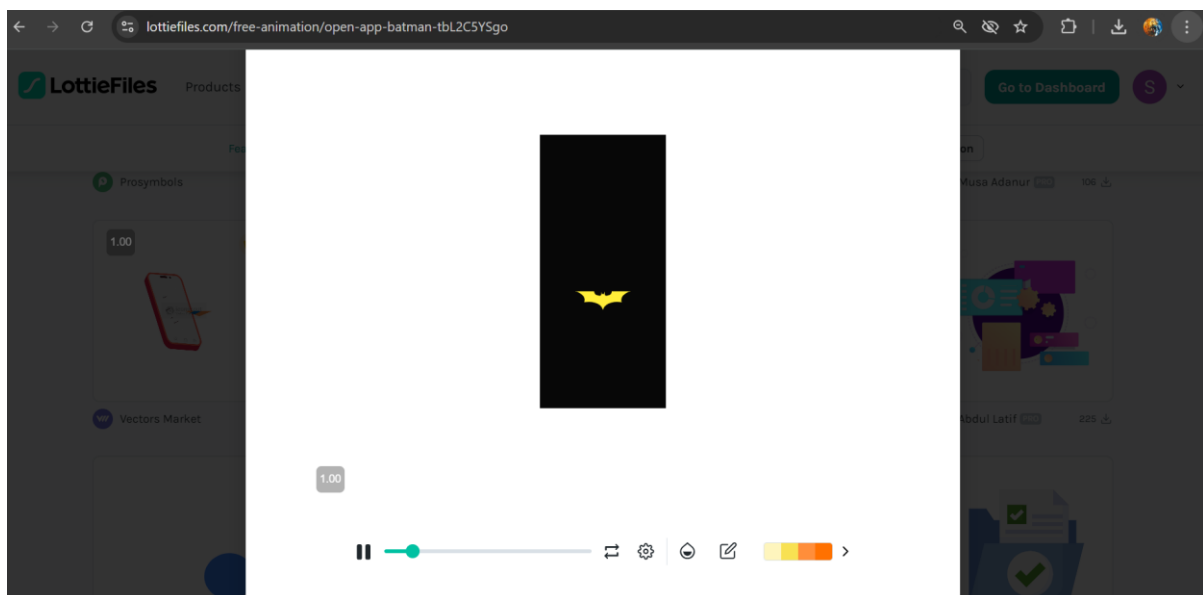

To create a mobile UI Animation using Lottie.

### Procedure:

Step 1: Sign in to the Lottie Files website.

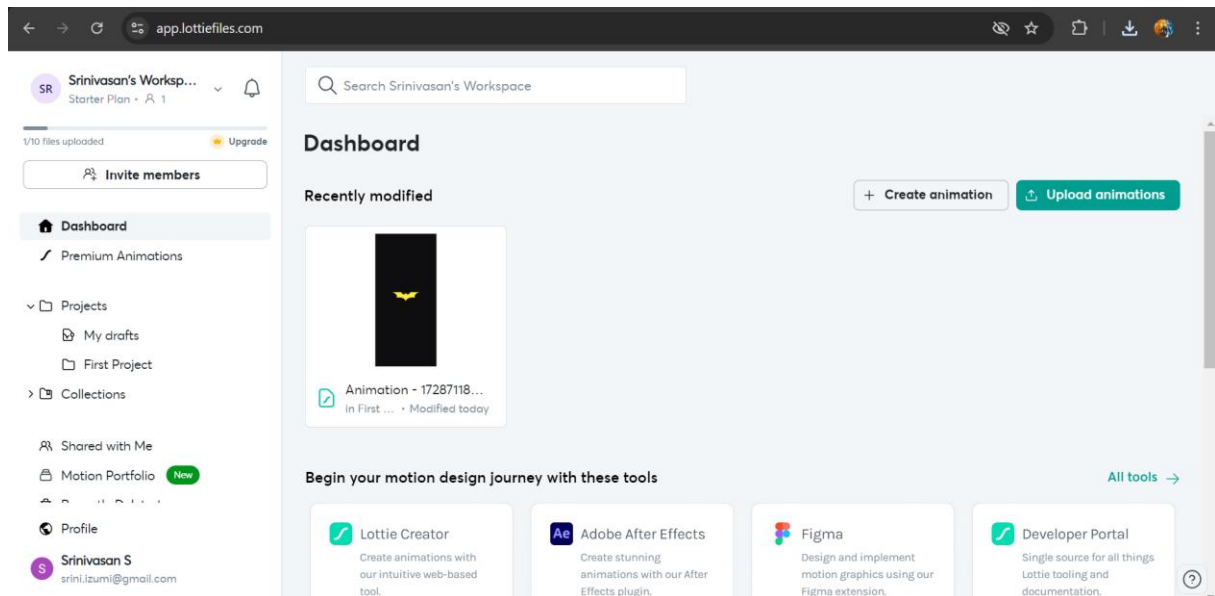

Step 2: Select any animation from the free community animations to fit your website.

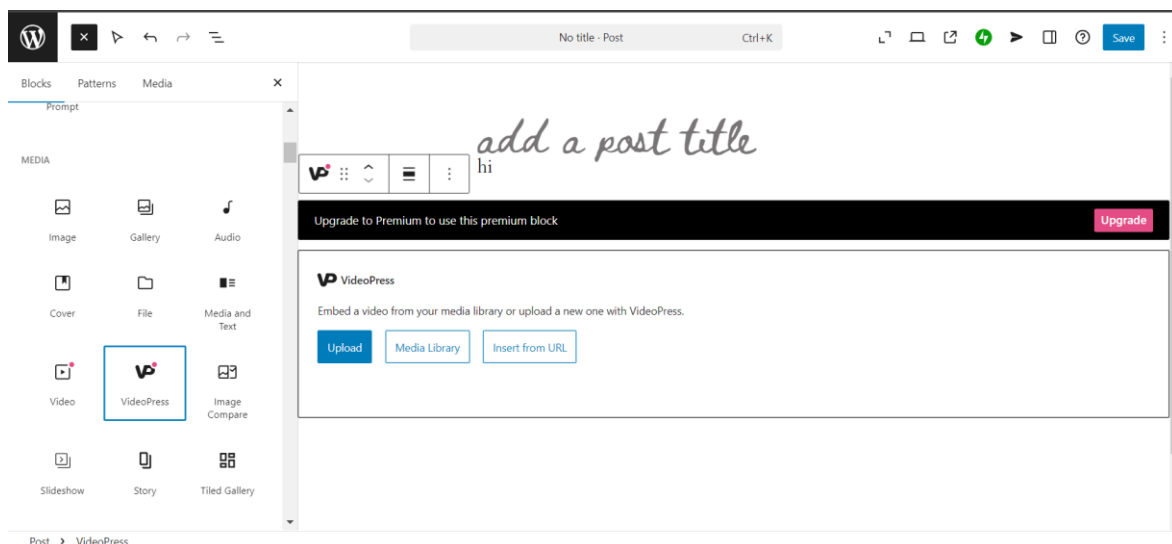

Step 3: You can change the appearance of the animation by changing colour, playback speed, etc.

Step 4: After changing save the animation and download it as a JSON file.

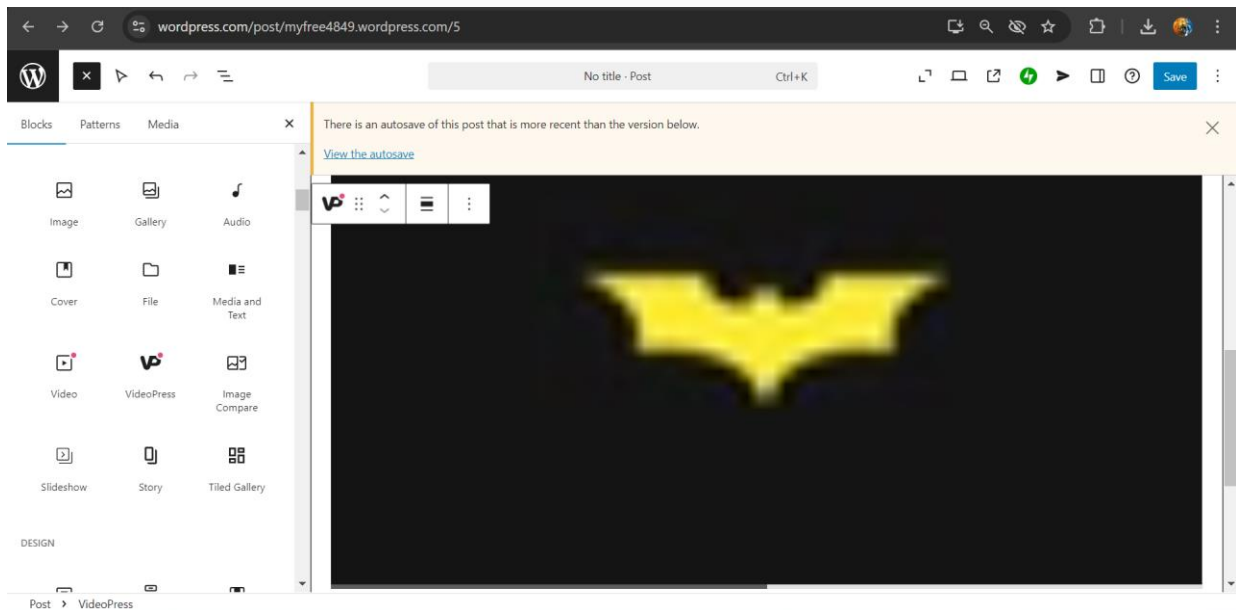

Step 5: Go to the WordPress dashboard and check the website to add Lottie Files. Otherwise download the plugins for the Lottie files.

Step 6: You can select where you want to place your animation.

Step 7: Create your animation or convert the SVG file to Lottie Files.

Step 8: On the website also you can change the playback speed, size etc.

Step 9: Save the changes on the website.

## **Result:**

Thus, the mobile UI Animation using Lottie was executed successfully.
