| EX NO: 2B DATE:	**Working with Audio Editing tool Audacity for perform audio compression by choosing a proper codec**

Aim:

   To perform audio compression by choosing a proper codec using Audacity Software.

Procedure:

    1.Go to the browser and paste the link https://www.audacityteam.org /

    2.Install the software based on your OS.

   3.Once you have done it, the welcome screen looks like this.

Working with Audacity Software:

Step 1: Click on the File menu and import the audio file then the screen looks like this

Step 2: Click on the effect in the Navigation Bar and click on the volume and compression then adjust the volume as shown in the image.

Step 3: Once done, click on the preview and play the audio then click on the apply button to finalize the compressed volume of the audio.

Result:

Thus the expected audio compressing using Audacity software was achieved successfully.
